CONTENTS VOLUME 47, 1980

Research Papers

An autocorrelation approach for parameter estimation of fractional order equal-root autoregressive models using hypergeometric functions
S.K. Spolia, S. Chander (Delhi, India) and K.M. O'Connor (Galway, Ireland) 1
Stochastic generation of monthly flows for ephemeral streams
R. Srikanthan and T.A. McMahon (Clayton, Vic., Australia) 19
Gamma synthetic hydrographs
T.E. Croley II (Christchurch, New Zealand) 41
Range analysis for reservoir storage with independent inflows
H.N. Phien, A. Arbhabhirama and P. Sutabutr (Bangkok, Thailand) 53
A continuous streamflow model
G.G.S. Pegram (Durban, South Africa) 65
Rainfall stormflow analysis to investigate spatial and temporal variability of excess rainfall generation
R.D.S. Clark (Adelaide, S.A., Australia) 91
A descriptive model of the relationship between rainfall and soil water table
K. Rennolls, R. Carnell and V. Tee (Farnham, Great Britain) 103
Topography and hillslope soil water relationships in a catchment of low relief
M.G. Anderson and P.E. Kneale (Bristol, Great Britain) 115
The spatial dimension in the interpretation of stream solute behaviour
D.E. Walling and B.W. Webb (Exeter, Great Britain) 129
Source identification for suspended sediments
D.L. Grimshaw (Nottingham, Great Britain) and J. Lewin (Aberystwyth, Great Britain) 151
Reservoir effects on sediment yield
D.L. Grimshaw (Nottingham, Great Britain) and J. Lewin (Aberystwyth, Great Britain) 163
The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
G.S. Tazioli (Bari, Italy) 173

Short Communication

Maximum-likelihood estimation of the general extreme-value distribution parameters
A. Otten and M.A.J. van Montfort (Wageningen, The Netherlands) 187

Book Reviews

Groundwater by R.A. Freeze and J.A. Cherry — G.H. Davis 193
Seepage and Groundwater Flow by K.R. Rushton and S.C. Redshaw — S.P. Neuman 194
An Evaluation of Shallow Groundwater Movement in Small Boulder Clay Catchment in Holderness by M. Bonell — W.H. van der Molen 195
Isotope Hydrology 1978, Vols. 1 and 2. (I.A.E.A. publication) — G.H. Davis 195

Publisher's Note 197

Research Papers

The preservation of skewness in linear disaggregation schemes
E. Todini (Pisa, Italy) 199
Daily flow model based on rainfall occurrences using pulses and a transfer function
N.T. Kottegoda and M.A. Horder (Birmingham, Great Britain) 215

0022-1694/80/0000—0000/$02.25 © 1980 Elsevier Scientific Publishing Company

A stochastic model for daily streamflow
J. Kelman (Rio de Janeiro, Brazil) 235
Adaptive real-time forecast of river flow-rates from rainfall data
P. Bolzern, M. Ferrario and G. Fronza (Milan, Italy) 251
On reservoir reliability
G.G.S. Pegram (Durban, South Africa) 269
Determining operating policies for a water resource system
C.H. Dagli and J.F. Miles (Birmingham, Great Britain) 297
A note on the performance of a ^{82} Br radioactive tracer in the River Skerne, England
L. Hamill (Middlesborough, Great Britain) 307
A predictor–corrector alternating-direction implicit method for two-dimensional unsteady saturated–unsaturated flow in porous media
U. Hornung and W. Messing (Münster, Federal Republic of Germany) 317
Comparison of calculated and in situ measured unsaturated hydraulic conductivity
B.K. Khosla (Karnal, India) 325
Regional groundwater motion in response to an oscillating water table
A. Vandenberg (Ottawa, Ont., Canada) 333
Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
I.D.L. Foster (Coventry, Great Britain) 349

Short Communication

Evaluating hydrodynamic dispersion coefficients – An extension to the paper by Basak, P. and Murty, V.V.N., 1979. *Determination of hydrodynamic dispersion coefficients using "inverfc". J. Hydrol., 41: 43–48.*
S.K. Gupta, R.K. Batta and R.N. Pandey (Karnal, India) 369

Discussions

Radial dispersion to an abstraction well – Comments
A. Zuber (Cracow, Poland) 373
Radial dispersion to an abstraction well – Reply
A.N.S. Al-Niami and K.R. Rushton (Birmingham, Great Britain) 376
Limited confidence in confidence limits derived by operational stochastic hydrologic models – Comments
J. Stedinger (Ithaca, N.Y., U.S.A.) 377
Limited confidence in confidence limits derived by operational stochastic hydrologic models – Reply
V. Klemeš (Ottawa, Ont., Canada) and A. Bulu (Istanbul, Turkey) 381
The extreme-value type-1 distribution and the principle of maximum entropy – Comments
H.N. Phien (Bangkok, Thailand) 385
The extreme-value type-1 distribution and the principle of maximum entropy – Reply
P. Jowitt (London, Great Britain) 389
Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley – A comment
J. Durazo, S. Gaona and J.L. Ortiz (Mexico D.F., Mexico) 391

Historical Note

Five letters from and to Hammurapi, King of Babylon (1792–1750 B.C.), on water works and irrigation
J. Neumann (Jerusalem, Israel) 393

Forthcoming Events 399
